Create Custom Barcode Type

This advanced feature enables a merchant to create custom barcode parsing rule/setting and work with any kind of non-standard barcode if the other 4 standard settings are not matching parsing scheme. The process is simple: first scan or enter sample barcode/digits then set the parsing rules.

Step 1: **Scan or enter your barcode**   Scan or enter your barcode here   OK

Step 2: **Set parsing rule for your barcode**

| Barcode Digit Position	1	2	3	4	5	6	7	8	9	10
Scanned/Entered Barcode	0	0	0	0	0	0	0	0	0	0
	p	p	p	p	p	p	p	p	p	p
Choose Position Identifier	C	C	C	C	C	C	C	C	C	C
	I	I	I	I	I	I	I	I	I	I

Step 3: **Test parsing rule**   TRY IT

Legend: (Hint: Valid format should contain at least 1 Item code number, 1 Price (Before decimal point) number and exact 2 Price (After decimal point) numbers)
